Computer Information Technology

Thomas Magliolo, Department Chair
Richard Melvin, Cathy LeBouef

It is the responsibility of all students taking a computer science internet course(s) to contact their instructor(s) at the beginning of the semester.

In the BCIS 1405, internet course, it is necessary for students to use the same textbook and software version that is being used at Alvin Community College Computer Information Technology Department. This allows students to locate correct assignments and examples. Internet students taking a computer science course have access to the computer laboratories when space is available.

In internet programming courses, it is recommended that students use the same software that is used at ACC. The student accepts the responsibility of installing the necessary software and creating the necessary files. Internet students taking a computer science programming course have access to the laboratories when space is available.
