

Computer Science

Computer Programming

Program Description

The Computer Science Technology Degree prepares students for a career in computer programming. Computer programmers create instructions that tell the computer what to do, such as which information to identify and access, how to process it, and what equipment to use. Individuals who are detail-oriented and have strong math and analytical skills are often good candidates for this field.

Career Opportunities

Computer programmers are employed in almost every industry, but the largest concentration is in the computer and data processing industry. Programmers also work for firms that provide engineering and management services, telecommunications companies, manufacturers of computer and office equipment, financial institutions, insurance carriers, health care organizations, education institutions, and government agencies. The average salary for a computer programmer in the state of Texas is \$72,000 according to www.onetonline.org.

Computer Science Computer Programming

Options

Associate of Applied Science Degree

Computer Programming 67-68 credit hours
(2 years)

Certificate

General Computer Data Processing.....26 credit hours
(1 year)

Advantages of ACC
