

Cherie Dee Richey

On a whim I took a sculpting class here at ACC and had no idea that I would enjoy it as much as I did. It changed my whole outlook on life. I enjoyed the creative process of shaping and molding clay so much that I decided to get my Associates of Fine Arts. I plan to continue my art education in the future. Art is an outlet that evokes expression, energy and passion. I love it and plan on staying in an artistic field always. It's great to go to work and love your job. I am the Visual Arts Coordinator here at ACC and look forward to meeting future art students.
