Alvin Community College Technical Standards for Polysomnography Program

General Job Description

Qualified applicants are expected to meet all admission criteria as well as essential functions. Students requesting reasonable accommodations to meet these criteria must inform the Program Chair in writing of the need for accommodations at the time of admission. The student is expected to contact the ADA counselor in the new ESC (Enrollment Services Center) to file the appropriate forms documenting the need for accommodations.

FUNCTIONAL ABILITY CATEGORY	REPRESENTATIVE ACTIVITY/ATTRIBUTE	EXAMPLES
GROSS MOTOR SKILLS	 Move within confined spaces Sit and maintain balance Stand and maintain balance Reach above shoulders Reach below waist 	Stand to perform patient preparation for PSG exam. Raise/lower arms and bend at waist or knees while applying electrodes and sensors.
FINE MOTOR SKILLS	 Pick up objects with hands Grasp small objects with hands Write with pen or pencil Key/type Pinch/pick or otherwise work with fingers Twist Squeeze with finger 	Grasp electrodes and sensors with hands during patient preparation. Type patient information into PSG software with keyboard. Document on paper tech notes. Change settings computer software with computer mouse. Troubleshoot equipment by turning knobs and changing wires then observing improvements.
PHYSICAL ENDURANCE	 Sustain repetitive movements Maintain physical tolerance for 8 or 12 hour periods Ability to perform activities day, afternoon, evening and night. 	Sitting in chair for long periods. Repetitive key strokes on keyboard while staging and scoring a PSG exam. Sit or stand for 12 hours shifts. Stand and perform repetitive procedure(s) on patients such as CPR.
PHYSICAL STRENGTH	 Push and pull 25 pounds Support 25 pounds Lift 25 pounds Carry equipment/supplies Use upper body strength Squeeze with hands 	Assist patient from bed to chair. Hoist patient up in bed. Move patient from stretcher to bed and back.
MOBILITY	 Twist Bend Stoop/squat Move quickly Climb Walk 	Bend to change equipment settings on floor, at knee level, waist level, chest level, eye level, above head. Make rapid adjustments if needed to ensure patient safety. Respond to patient quickly.

HEARING	Hear normal speaking level	Hear audible alarms. Hear patient
III AKII VO	sounds	over intercoms. Hear patients in
	Hear faint voices	dark rooms.
	Hear in situation when not able	
	to see lipsHear auditory alarms	
VISUAL	See objects up to 20 inches	Read patient chart to determine
	away	correct therapy. Visually assess
	See objects up to 20 feet away	patient color to assess for hypoxia.
	Use depth perception	Read settings on monitors and other equipment. Visually assess for
	 Use peripheral vision Distinguish color	changes in dimly lighted patient and
	Distinguish color intensity	control rooms. Confirm settings
	See objects and read in low	visually such as with ventilator
	lighted areas	display.
TACTILE	Feel vibrations	Assess patient by feeling for patient
	Detect temperature	pulse and O2 Saturation using pulse
	Feel differences in surface	oximetry.
	characteristicsFeel differences in sizes, shapes	
	Detect environmental	
	temperature	
SMELL	Detect odors from patients	Assess for noxious odors originating
	Detect smoke	from the patient or environment
	Detect gases or noxious smells	(example gas leak or smoke).
READING	Read and understand written decomments	Read and interpret physician orders, physician, therapist and nurses
	documents	notes. Read from a computer
		monitor screen. Gather data
		reasonably accurate, and in a
		reasonable amount of time to ensure
		safe and effective patient care relative to other care givers.
MATH COMPETENCE	Read and understand columns	Read and interpret patient graphics
	of writing	charts and graphic displays. Perform
	Read digital displays	basic arithmetic functions in order
	Read graphic printouts	to calculate head measurements using 10-20 system. Convert time
	Calibrate equipment Cananata and long from	given in minutes into hours and
	Convert numbers to and/or from the Metric System	minutes. Calculate sleep efficiency,
	Read graphs	sleep onset, and all calculations
	• Tell time	needed in the final PSG report.
	Measure time	
	Count rates	
	Use measuring tools	
	Read measurement marks Add subtract multiply and/or	
	 Add, subtract, multiply, and/or divide whole numbers 	
	Compute fractions	
	Use a calculator	
	Write numbers in records	

EMOTIONAL STABILITY	 Establish appropriate emotional boundaries Provide emotional support to others Adapt to changing environment/stress Deal with the unexpected Focus attention on task Monitor own emotions Perform multiple responsibilities concurrently Handle strong emotions 	Provide for safe patient care despite a rapidly changing and intensely emotional environment. Perform multiple tasks concurrently. Maintain enough composure to provide for safe and effective patient care despite crisis circumstances.
ANALYTICAL THINKING	 Transfer knowledge from one situation to another Process information Evaluate outcomes Problem solve Prioritize tasks Use long-term memory Use short-term memory 	Evaluate different sources of diagnostic information to help arrive at a patient diagnosis. Evaluate priorities in order to provide for the most appropriate care. Appropriately evaluate data in order to notify physician and nursing when necessary.
CRITICAL THINKING	 Identify cause-effect relationships Plan/control activities for others Synthesize knowledge and skills Sequence information 	Evaluate different sources of diagnostic information to help arrive at a patient diagnosis and treatment. Evaluate data in order to formulate an appropriate action plan.
INTERPERSONAL SKILLS	 Negotiate interpersonal conflict Respect differences in patients, fellow students, and members of the healthcare team. Establish rapport with patients, fellow students, and members of the healthcare team. 	Communicate effectively with disagreeable patients, family doctors, and nurses and other staff in order to attempt to meet therapeutic goals for the patient.
COMMUNICATION SKILLS	 Teach Explain procedures Give oral reports Interact with others Speak on the telephone Influence people Convey information through writing 	Communicate effectively and appropriately with doctors, nurses, patients, family, and other staff in order to provide for most effective and efficient patient care.
