Help People Breathe Better as a Respiratory Therapist

Texas is second in the nation for employing respiratory therapists. The demand will continue to increase because of substantial growth of the middle-age population. Advances in the treatment of heart attack victims, accident victims, and premature infants will also increase the demand for respiratory therapists.

Respiratory therapists are the experts in their facility for respiratory care technology. Our program will teach you how to work with advanced medical

Career Opportunities

The Respiratory Care Program at Alvin Community College prepares you to enter a career field that is projected to grow by 23% between 2016 and 2026.

The average annual wage of a Respiratory Therapist in Texas is \$61,490, plus shift or weekend differential.

equipment that is instrumental in helping people who have trouble breathing.

If you are compassionate, detail oriented, patient, and possess good problem solving skills, you may be a good candidate to apply for the Respiratory Care Program.

What Will I Study?

Respiratory care professionals have the incredible responsibility of helping people get the oxygen they desperately need to live. They care for patients of all ages, from premature babies with underdeveloped lungs to an elderly individual who may have been affected by disease. Therapists also give patients the treatments, resources and tools to improve their quality of life
